

Why Plant a Tree?

Because Trees...

- o filter pollution from the air
- o help recycle water
- o prevent soil loss
- o create shade
- o give shelter from wind and rain
- o provide homes for animals
- o make food for humans and wildlife
- o provide an interesting, soothing, learning environment for children and your community
- o and much more!

Save the
Planet

Planting a tree is not only environment-ally friendly, but its the gift that grows! This is a gift for the environmentally conscious, its ethical and is the type of gift that, well, just makes you feel good!

Trees are the speechless children of nature. Giving oxygen, fruits, wood, raw materials for paper, cloth, medicine trees play the role of friends of men. During summer they give us not only shadow but also desired refreshes. They protect our houses from devastating storm. There are many advantages of trees. It's hard to find out any demerit of trees. They are really our friends. They are very caring for us.
